

# Emerging Skills Trends Survey 2019

Shumei Wu

January 18, 2023

# OUTLINE

- ▶ Executive Summary
- ▶ Introduction
- ▶ Methodology
- ▶ Results
  - ▶ Visualization – Charts
  - ▶ Dashboard
- ▶ Discussion
  - ▶ Findings & Implications
- ▶ Conclusion
- ▶ Appendix

# EXECUTIVE SUMMARY

- ▶ Nowadays, technologies are changing unprecedentedly. In order to keep pace with changing technologies and remain competitive, it is critical to identify future IT skill requirements and trends.
- ▶ This presentation will display the status of current technology usage and future technology trends.
- ▶ Through the insights of data analysis, it is helpful for the firm to make informed data-driven decisions, like hiring plan and budget plan.

# INTRODUCTION

- This presentation is made for stakeholders in the domain of global IT and business consulting services.
- The nature of this analysis is quantitative and descriptive.
- This analysis will answer three questions:
  - What are the top programming languages in demand?
  - What are the top database skills in demand?
  - What are the popular integrated development environments (IDEs)?

# METHODOLOGY

- ▶ **Data source:**

- ▶ Using a modified subset of the 2019 Stack Overflow Developer Survey dataset.

- ▶ **The Process of dealing with data:**

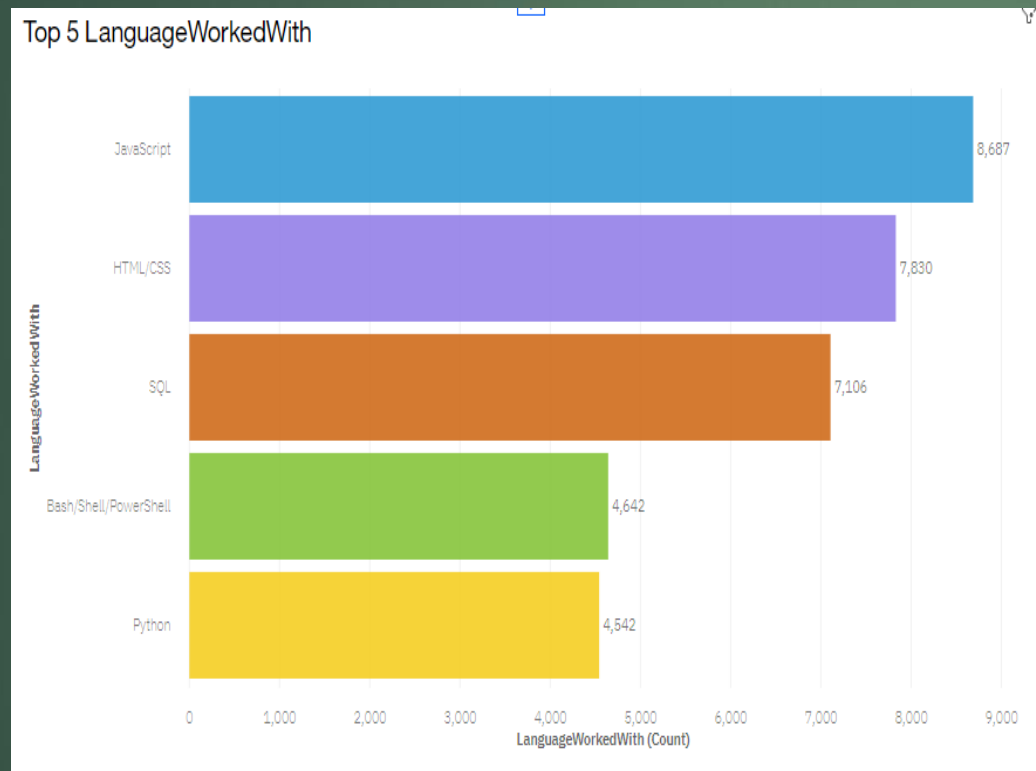

- ▶ Collecting Job related data using APIS and web scraping
- ▶ Wrangling data by finding missing data and duplicates, normalizing data, and so forth.
- ▶ Making exploratory data analysis on distribution, outliers and correlation.
- ▶ visualizing data on distribution, relationship, composition, and comparison.
- ▶ Using Cognos Dashboard Embedded(CDE) to create three dashboards: “Current Technology Usage” , “Future Technology Trends”, and “Demographics”.

# RESULTS

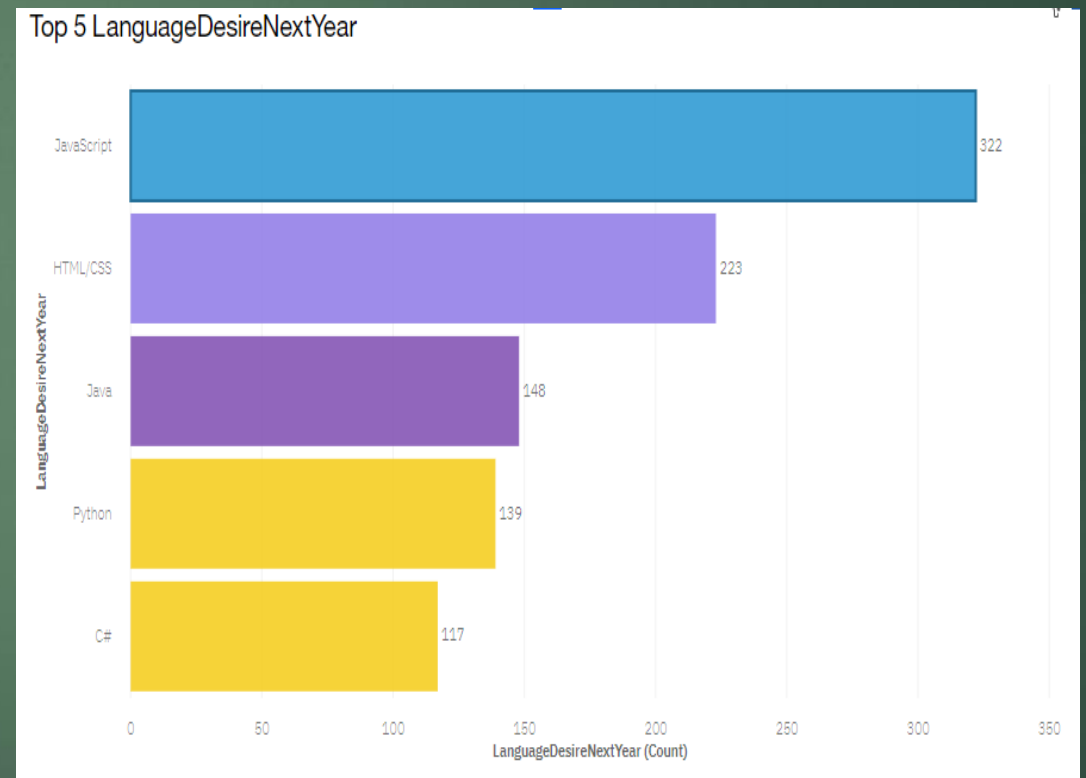

- ▶ The data is a modified subset from the 2019 Stack Overflow Developer Survey dataset under a ODbL: Open Database License.
- ▶ It contains two data sets:
  - ▶ One is survey data technologies normalized, which consists of approximate 75,000 respondents engaged in the survey.
  - ▶ The other one is survey data demographics, which has about 11,400 respondents answering demographics questions such as age, education level, gender and so on.

# PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

## Findings

- ▶ JavaScript and HTML/CSS continue to be the top two most popular programming languages for this year and next.
- ▶ Java, python and C# rank up top five next year
- ▶ SQL and Bash/Shell/PowerShell rank down from top five next year.

## Implications

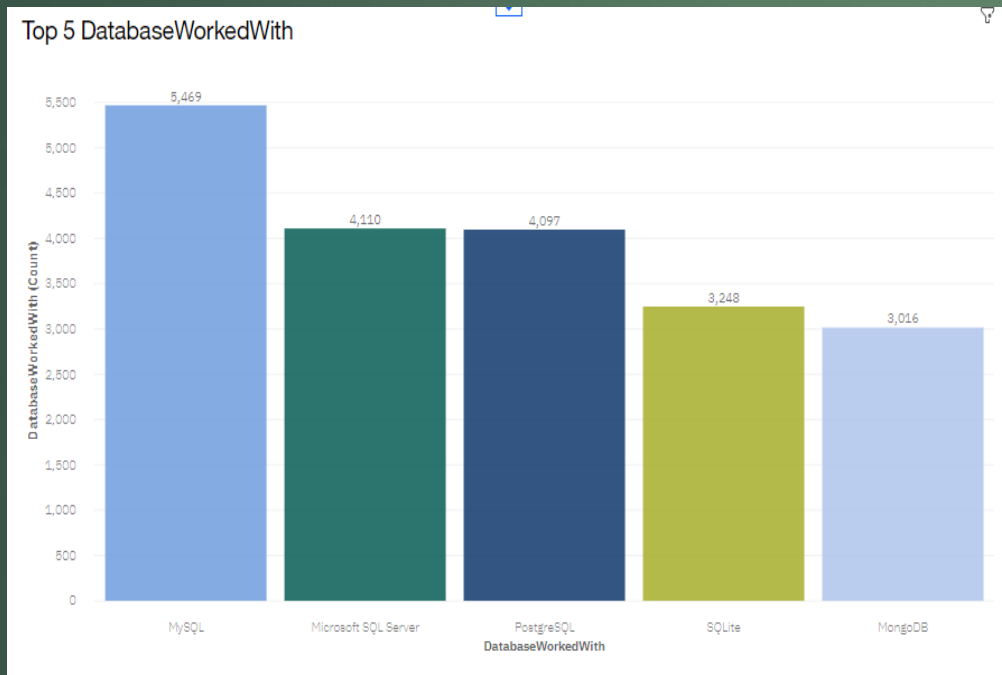

- ▶ Continue to hire the same number of staff skilled at JavaScript and HTML/CSS.
- ▶ Hire more staff skilled at Java, python and C#.
- ▶ Hire less staff skilled at SQL and Bash/Shell/PowerShell.

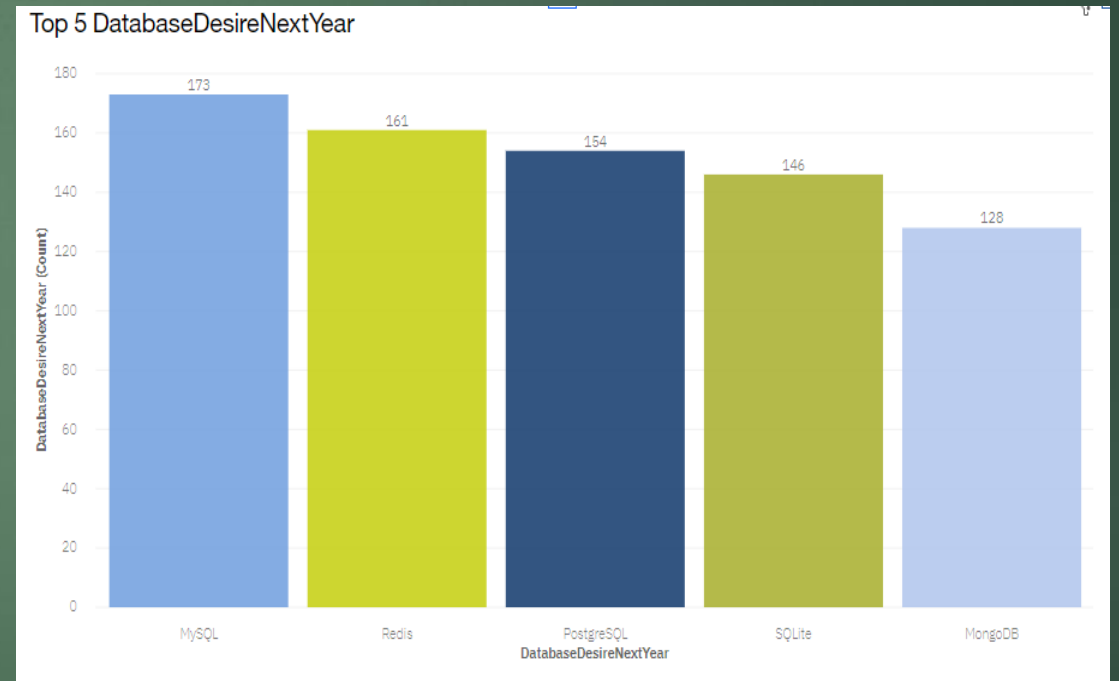

# DATABASE TRENDS

## Current Year

## Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

## Findings

- ▶ My SQL continues to be the most popular database for this year and next.
- ▶ Microsoft SQL Server drops from top five for next year.
- ▶ Redis ranks up to the top second for next year.

## Implications

- ▶ Hire the same number of staff skilled at My SQL next year.
- ▶ Hire less staff skilled at Microsoft SQL Server next year.
- ▶ Hire more staff skilled at Redis next year.

● Primary/elementary school ● Professional degree (JD, MD, e... ● Secondary school (e.g. Americ...

# DISCUSSION

# OVERALL FINDINGS & IMPLICATIONS

## Findings

- ▶ Language: JavaScript and HTML/CSS remain top two, Java, python and C# rank up to top five.
- ▶ Database: MySQL remains top one. Microsoft SQL Server drops from top five. PostgreSQL, SQLite and MongoDB are still of the top five. Redis ranks up to top two.
- ▶ Platform: Windows drops dramatically, whereas Android rocks up to second.
- ▶ Webframe: jQuery, Angular/Angular.js and ASP.NET drops a lot, whereas Laravel rocks up to top one.

## Implications

- ▶ Continue to hire same staff skilled at JavaScript and HTML/CSS, and more Java, python and C#
- ▶ Hire more staff skilled at Redis.
- ▶ Hire more staff skilled at Android.
- ▶ Hire more staff skilled at Laravel, but less jQuery, Angular/Angular.js and ASP.NET.

# CONCLUSION

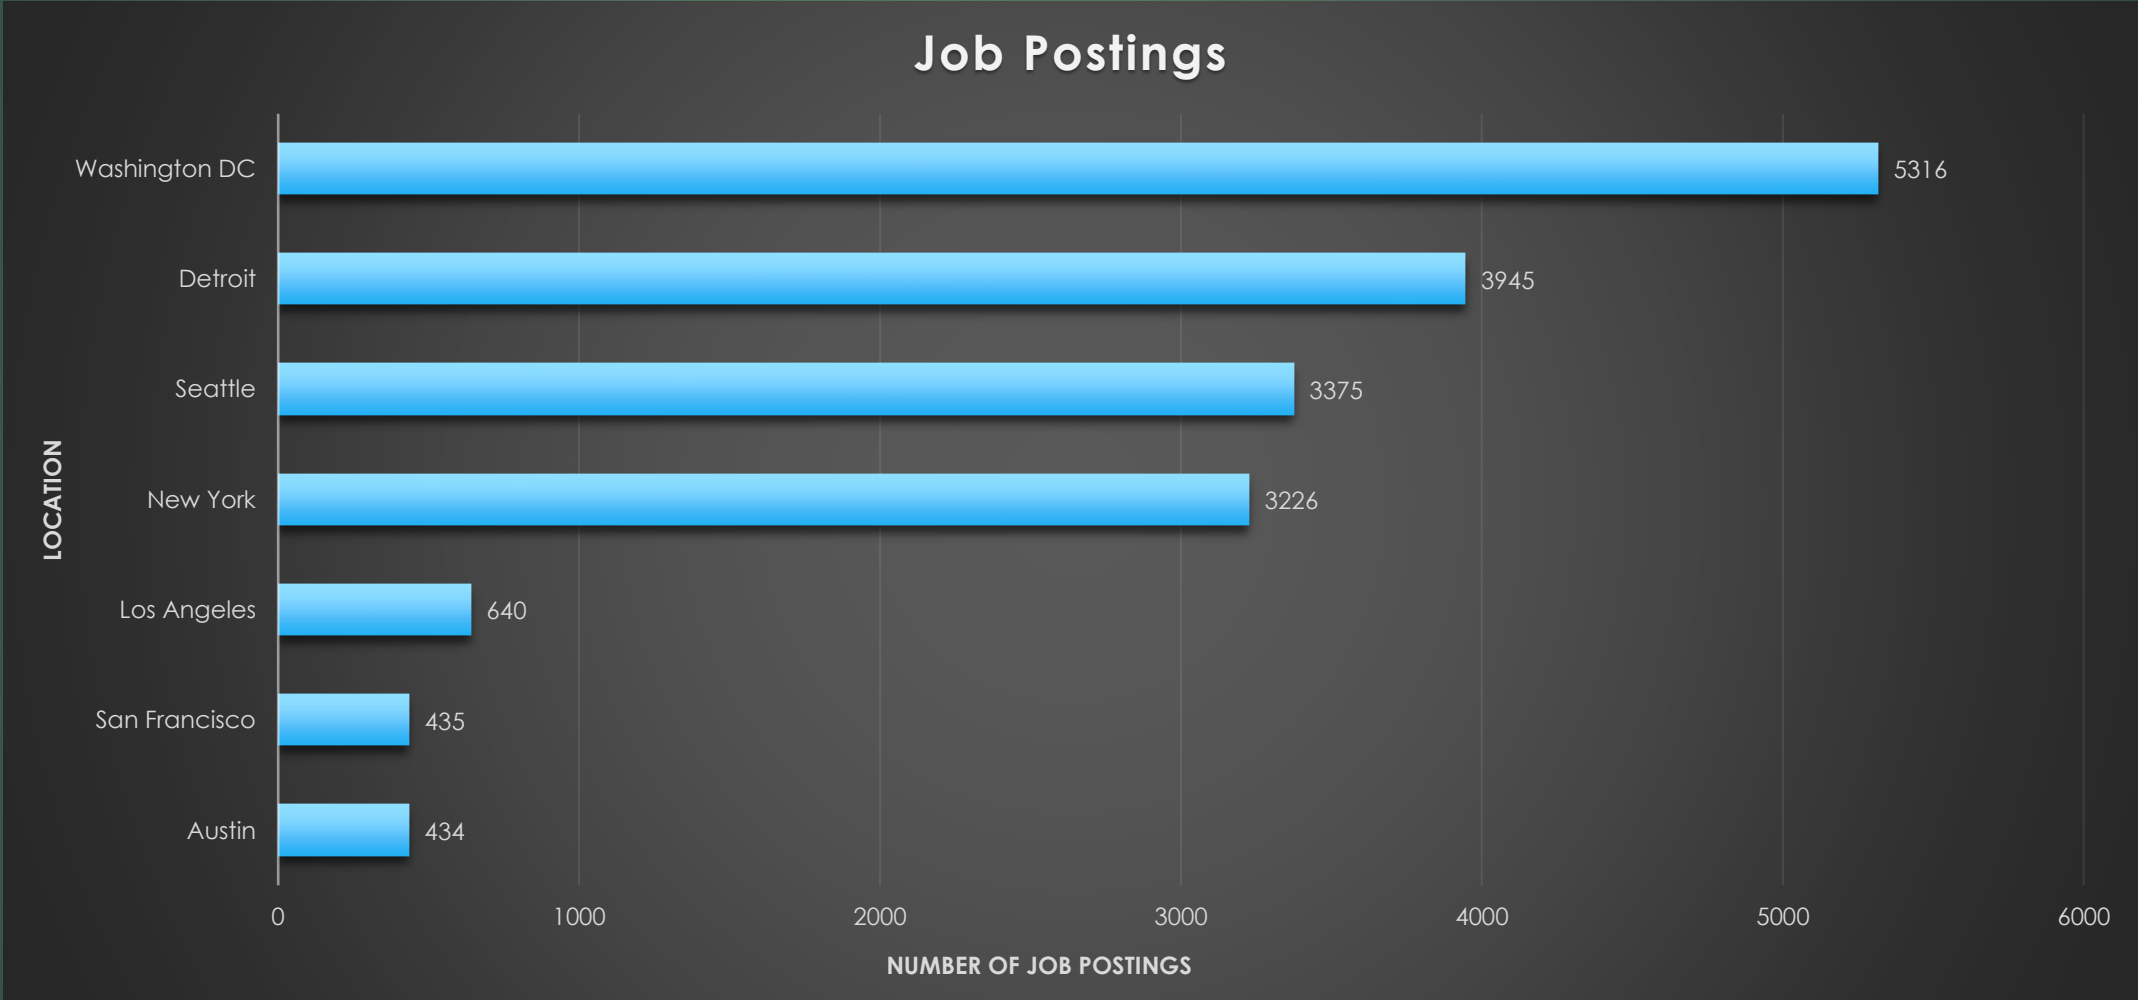

- ▶ Carve out budget to hire more staff with skilled needed to fill any gaps.
- ▶ Organize some program to upskill those already hired to keep competitive.
- ▶ Make staff adjustments for those no longer in demand.
